AETHER DYNAMICS CORP

Executive Financial Report 2010 – 2026

Synthetic Dataset for SYNAPTIX COMMAND Prototype Testing

Generated: 2026-03-15 | Classification: Internal Synthetic

1. Executive Summary

This report presents a comprehensive synthetic financial history of Aether Dynamics Corp, a fictional industrial IoT and sensor technology company, covering the period 2010 through 2026. The data exhibits a clear multi-phase trajectory: sustained growth through 2018, a sharp contraction during 2019–2021, a recovery phase beginning in 2022, and a temporary setback in 2024 followed by renewed expansion. All figures are entirely synthetic and constructed for testing document intelligence, RAG, anomaly detection, and analytics capabilities.

2. Revenue Trajectory

Revenue grew from $42.5M in 2010 to a peak of $118.9M in 2018, representing a compound annual growth rate of approximately 13.7% over the expansion phase. The subsequent contraction reduced revenue to $68.5M by 2021. Recovery brought revenue to $124.7M by 2026. The year 2024 shows an anomalous dip to $88.1M, driven by a synthetic inventory write-down and project delays that disproportionately affected Q3 performance.

Year	Revenue ($M)	YoY %	Phase
2010	42.5	—	Growth
2012	55.8	+15.8%	Growth
2015	85.6	+18.2%	Growth
2018	118.9	+5.5%	Peak
2019	97.4	–18.1%	Decline
2020	71.2	–26.9%	Decline
2021	68.5	–3.8%	Trough
2022	82.3	+20.1%	Recovery
2024	88.1	–8.0%	Anomaly
2026	124.7	+14.0%	Expansion

3. Key Anomalies and Test Cases

The following synthetic anomalies have been deliberately embedded for detection testing:

• **Duplicate Invoices:** INV-2023-1087 (exact) and INV-2024-1112 (near-duplicate). See Duplicate_Invoice_Investigation.md.

• **2024 Revenue/Inventory Anomaly:** Q3 revenue share collapsed; inventory spiked to $28.4M.

• **Budget Overruns:** Manufacturing OpEx +11.4% vs budget in 2024; elevated consulting spend.

• **Unusual Expenses:** Multiple consulting transactions >$85k in 2024 (normally <$45k).

4. Cost Structure & Margins

Gross margins typically ranged 28–35% outside crisis years. During 2019–2021 and again in 2024, cost ratios rose, compressing operating margins. Operating expenses averaged 18–21% of revenue. Detailed quarterly breakdowns are available in Quarterly_Financial_Statements.xlsx.

5. Data Sources & Consistency

All figures in this report are consistent with: Revenue_History_2010_2026.xlsx, Quarterly_Financial_Statements.xlsx, Expense_Transactions.csv, and Invoice_Register.xlsx. Cross-file totals have been validated during generation. This document is intended solely for prototype testing of the SYNAPTIX COMMAND platform.
